REMARKS

SEP 19 2007

Claim 37 has been further amended to more specifically define Applicants' claimed invention. Antecedent basis of the amendment can be found in the claims and the Specification as filed.

More specifically, in the Response dated August 23, 2007, Applicants have clearly shown the supports for the terms of "promoting soft tissue growth" and "promoting bone tissue growth" in all earlier applications (see pages 6-7 of the Response). Applicants point out in said Response that the terms of soft tissue growth, soft tissue cell growth, and soft tissue colony growth were used interchangeably in the early applications. Similarly, the terms of bone growth, bone tissue growth, and bone cell growth were also used interchangeably.

It is respectfully submitted that Claims 37-43, the pending claims, are now in condition for allowance and such action is respectfully requested.

Should there be any outstanding matters that need to be resolved in the present application, the Examiner is respectfully requested to contact Yi Li (Reg. No. 44,211) at the telephone number of the undersigned below in an effort to expedite prosecution in connection with the present application.
